

Measuring value can take many forms and is needed for a variety of reasons. At RLB, we help businesses make better decisions by truly understanding the bigger picture. A proper business valuation is the starting point for tax planning strategies, the purchasing or sale of a business, and even succession planning. We can also support you as you navigate unforeseen challenges such as separation or divorce, a business dispute, or even the expropriation of your business. Knowing the value of your business is crucial to making sound decisions for the future of your business and your legacy.

## The right type of Valuation for you

Our valuers can utilize the most suitable valuation approach from a wide range of recognized methodologies:

- Asset-Based Valuations
- Capitalization of Cash Flows or Earnings
- Build-up methods
- Discounted Cash Flows
- Market-Based Valuations

## The reporting you need

Our valuation reports are prepared in accordance with the Practice Standards of the Canadian Institute of Chartered Business Valuators, which allows for 3 levels of reporting:

- Calculation of Value – most affordable, least assurance
- Estimate of Value – higher assurance, more expensive
- Comprehensive Value – highest assurance, most expensive

## Certified Expertise

Our team of Chartered Business Valuators (CBV) will use their vast knowledge of business valuation, modelling and financial trends to give you a clear understanding of your business. Our extensive experience across many industries gives us the distinct advantage of understanding the intricacies of your unique realm of business.
